

## WELCOME TO NEXT STEP RECOVERY FOR MEN

Next Step Recovery for Men is a transitional sober living facility located 5 minutes from downtown Asheville, NC where residents can learn to recover from alcoholism and chemical dependency; both diagnosable and treatable diseases. Our program is designed to help you live in a sober environment, immerse yourself in the fellowships of AA or NA, and to help you live a healthy lifestyle. Recovery is possible if you are willing to follow suggestions and have an open mind to new ideas.

Next Step Recovery requires residents to commit to a minimum of 90 days; however, the average length of stay is six to nine months. At 12 months, the resident will re-evaluate their stay with the Executive Director.

In any group of individuals, there must be standards for behavior and expectations for participation. At Next Step Recovery, these standards are based on practical needs. We want to help you build self-respect, foster self-discipline, and become a part of a recovery based community. Establishing a chemical-free community life with other residents is essential.

At Next Step Recovery, you are responsible for your own treatment and recovery. We are here for you every step of the way holding you accountable. You will become part of a community with other recovering people where cooperation and consideration for others are cornerstones of the program.

This program is designed to immerse all residents in the 12-step way of life. Foundations of our program include: consistent employment, volunteering, or education in a recovery-safe environment; building a trusting relationship with a Sponsor; and adherence to our Program Guidelines. Next Step Recovery's standards promote self-discipline, which is required for full acceptance of any 12-Step program. These standards are essential to your health, safety, and welfare. They are not to be viewed as disciplinary or punitive measures.

We sincerely want you to be an active participant in your own recovery process. There is one goal at Next Step Recovery - RECOVERY. Do not try to change the program; work on changing yourself.

Sincerely,

## STANDARDS

Next Step Recovery affords the time and support needed for you to acquire the necessary skills to effectively transition into a healthy, sober lifestyle and return to work while residing in a structured environment.

Addiction Treatment and Chemical Dependency Professionals stress the importance of long-term client exposure to recovery and addiction treatment. Alcohol and drug addiction studies have shown that the chances of achieving long-term sobriety are greatly increased by an extended stay in a sober living home that offers 12-step support. If a client forgoes an alcohol and drug-free sober living home, the result is all too often a return to alcohol and/or drug use, thus leading to further costly addiction treatment.

Everything you are asked to do at Next Step Recovery has a therapeutic value. The standards are a therapeutic tool adhered to by residents for their protection and care. At first, you may not understand the value of these standards, but as your time at Next Step Recovery increases, they will become clear. Here, life in the community may be challenging at times, but you will soon find the meaning and strength that comes with being a part of a community of individuals working together in their recovery program.

Standards will be discussed periodically by the staff of Next Step Recovery to ensure understanding and compliance.

### **Failure to comply with NSR standards will lead to one of the following interventions:**

- Meeting with the Executive Director and/or staff to develop a therapeutic resolution
- Depending upon the seriousness of the problem and the frequency of the offense, a decision for a therapeutic discharge may be made.
